**NO TAPE?
NO GLUE?
NO KNIVES?
NO KIDDING!**

HERE'S HOW: Trim out the 3 pieces that form your papercraft as indicated. Don't forget to cut the color-coded assembly slots in each piece. Fold the base piece on the dashed lines to form a box and secure by sliding the two vertical RED slots into each other (loose ends stay INSIDE the box). Mountain-fold the dashed lines on the tabletop piece to 90°. Fold the character piece in an accordion style and insert into the folded tabletop piece by sliding the BLUE slots into each other. Then insert your completed character UNIT into the base piece.

FOLDING TIP!

Use a ruler or straight edge and score (the act of creating a line or depression in the paper) all dashed lines with the CLOSED tip of your scissors before you make your folds. You'll achieve a super clean pro-papercrafting look! (Just be sure to use an old surface when pressing your scores instead of that brand new kitchen table. YIKES!)

BONUS! Make multiple Pudding Monsters and place them up against each other to invent monstrously large puddings!

Pudding Monsters and ZeptoLab are the trademarks or registered trademarks of ZeptoLab UK Limited. ©2013. All Rights Reserved. Used with ZeptoLab's express permission.

NOTE! See this BLUE assembly slot hiding here? It starts at the arrow and stops half way across the bottom edge of the character.

Character piece (mountain-fold on one dashed line and valley-fold the other)

Tabletop piece (mountain-fold on each dashed line)

Base piece (mountain-fold on each dashed line)
